Control Layer Fundamentals

Thursday, March 17th, 12:00pm EST

COST: Attendance is free! Online registration is required. www.bec-rt.org

PRESENTERS: Joseph J. Anetrella, AIA, FCSI, CCS, LEED AP, senior architect/facilities, Terracon Consultants, Inc.

SCHEDULE: Thursday, March 17th, 12pm EST Virtual Presentation
Link distributed to registrants via email

PRESENTATION SUMMARY: Join us for a presentation on the four major control layers of the building enclosure. Joseph Anetrella will explain the mechanisms of heat, air, bulk water and vapor and how they transport through building assemblies. This discussion will cover the importance of air barriers and continuous insulation as well as common installation challenges seen in the field. He will also present key strategies for achieving durable, energy-efficient, and thermally comfortable wall, roof and below-grade assemblies.
